RECOGNIZED TIME PERIODS

ARCHAIC 8000-3000 B.P. Hunter Gatherers Atl-Atl - Ground Tools Weaving - Copper Tools

PALEO

12,000 ~ 8000 B.P.
Hunter Gatherers
Blg Game Hunting
Pressure-Flaked Tools

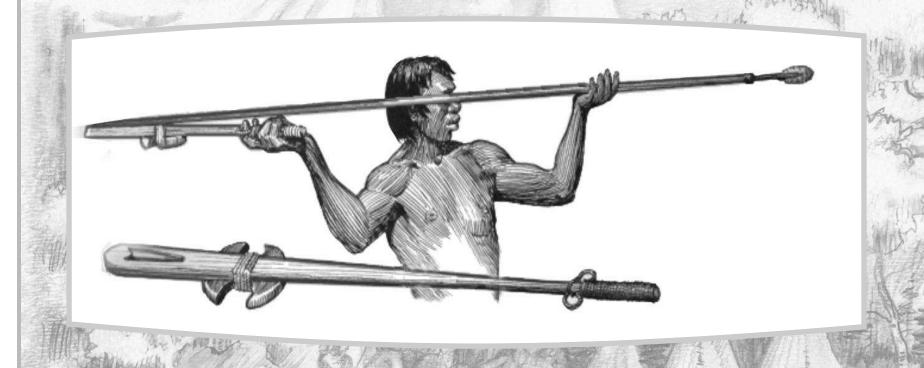

WOODLAND 3000-600 B.P.

Settlement - Agriculture Bow & Arrow - Pottery Artistic Expression Effigy Mound Building

HUNTING & DEFENSIVE TOOLS:

Projectiles include arrowheads, atl-atl dart points, spears
Defensive tools include Bolo, tomahawk, knife, spear/lance, atl-atl,

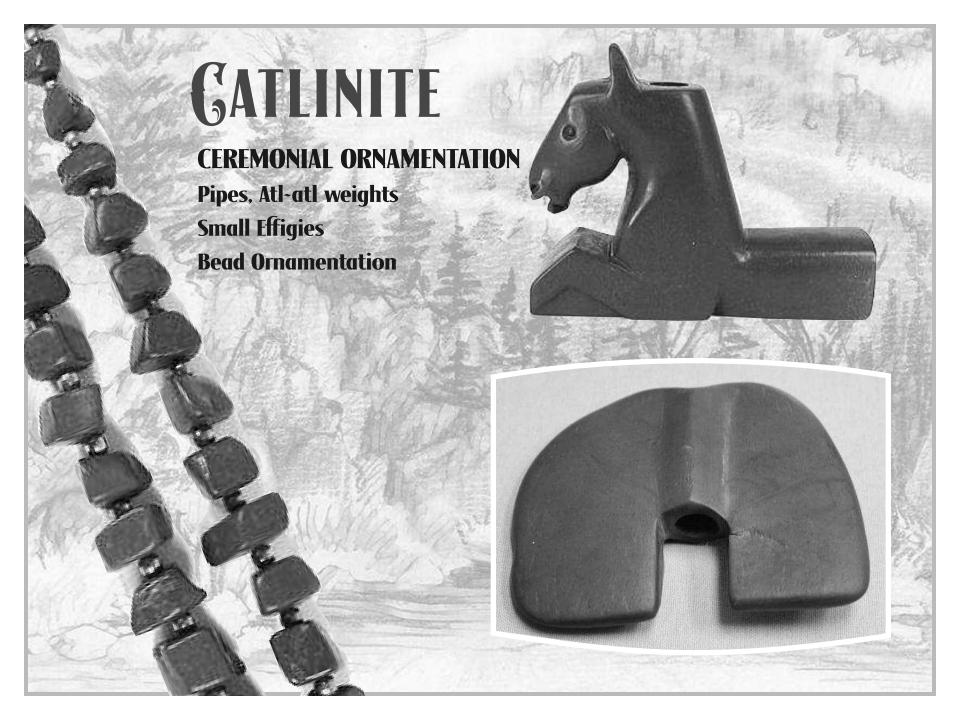

TYPES OF STONE TOOLS

DOMESTIC TOOLS:

Includes scrapers, drill, burin, hammer, club, axe, celt, hoe, knife.

Bone Tools: Sewing needles, knives, arrowheads, hoe, knife handles

TOOLMAKING METHODS

Peck & Grind

Pressure Flaking

TECHNOLOGY

HAFTING WAS A MAJOR SHIFT IN TECHNOLOGY

Hafting increased efficiency, got more work done with less effort: handles for knives, clubs. Atl-atl to bow and arrow in Woodland era

WHAT HAVE WE LEARNED?

Studying artifacts helps us understand the people and their cultures. Patterns of movement and trade routes. Shows people were connected even before the U.S. Mail, Internet and texting.

THE JAN GAAL GOLLECTION

Donated to MHS in 2009

Most artifacts found in 1940-1945 around lakes within 20 miles of Morristown Represents 8,000 years of prehistory

- ~ Four styles of projectile points shown here
- ~ A variety of materials used

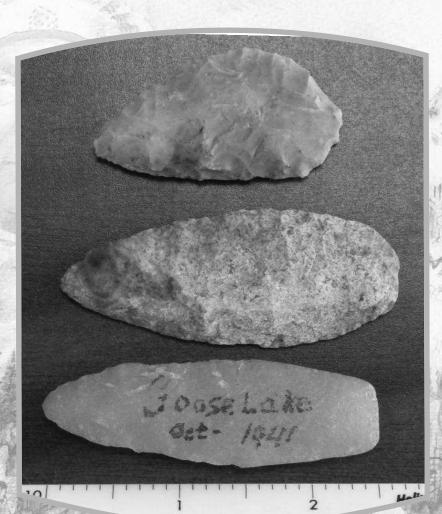

KNIFE BLADES

~ Knife blades

SCRAPERS & BLADES

- Scraper could be used for a hundred different tasks.
- ~ Knife blade, typical leaf shape
- Knife blade made of Hixton silicified sandstone, probably a trade item.

DART POINTS

- ~ Typical spear or atl-atl dart points. Side-notched, beveled bottoms.
- ~ Note the silicified sandstone on right.

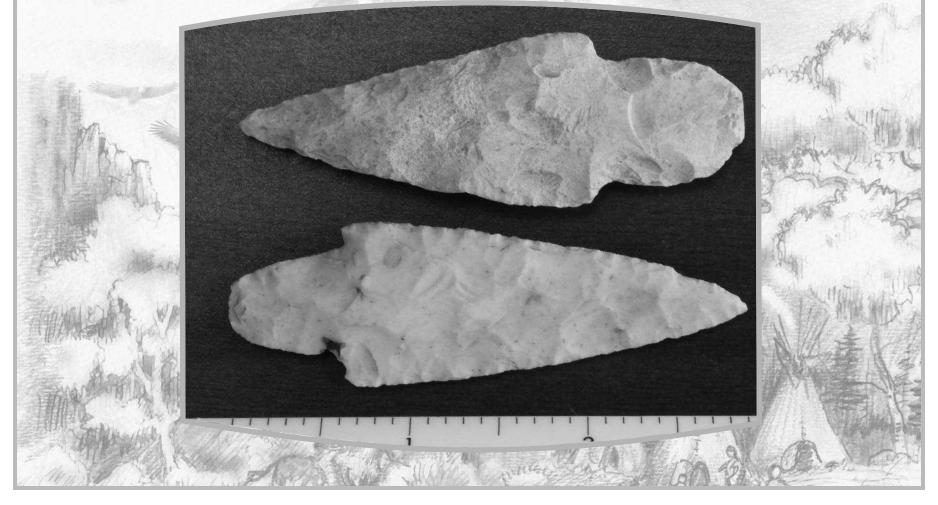

- Ceremonial pipestone piece, probably worn by an elder or chieftain.

~ Typical Adena-style spearpoints made during the Woodland era.

~ Rounded base

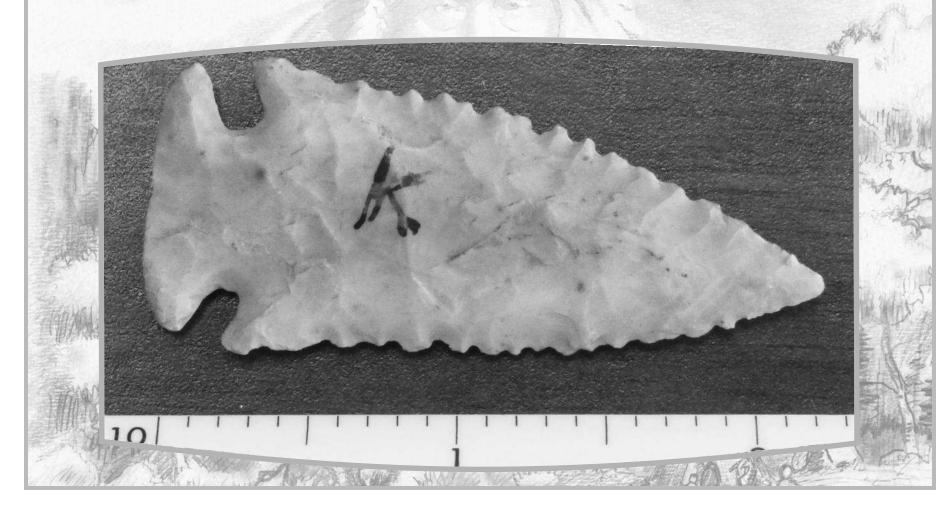

SPEAR POINTS

- ~ Older spearpoints, unusual style for the Cannon Valley area.
- Bottom right is oldest piece in collection.

BLADE - SPEAR POINT

- Bifurcated or serrated blade (or spearpoint). A rare find in the Cannon Valley area.

- ~ Large pieces found near Gorman Lake and Lake Elysian in LeSeuer County
- ~ Top is probably a Woodland-era Adena spear point.
- Bottom piece was perhaps a knife or ceremonial point.

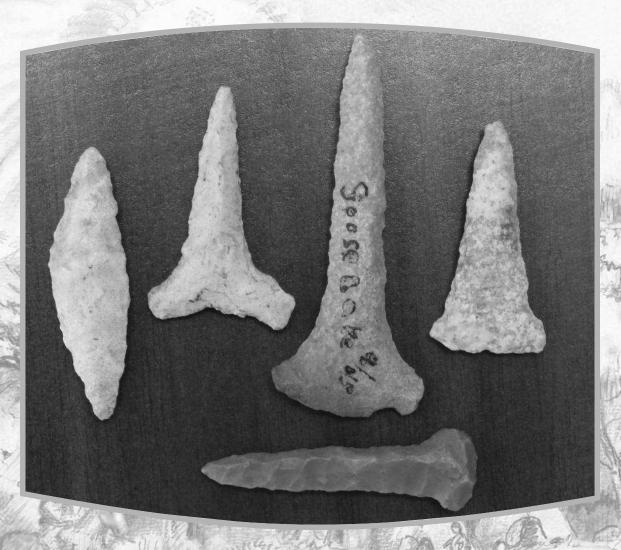

BLADES & SPEAR POINTS

- Five to six-inch knife blades or lanceolates
- ~ Found in Rice County, MN at Shield's Lake and Cedar Lake in 1940s

AWLS & DRILLS

- Some awls and drills had "T-heads" like these to fasten to a shaft for drilling with a bow.

- ~ Triangular Woodland arrowheads, 1100~300 BP.
- Middle point (knife blade) has unusual ground edges.
- ~ Smaller arrowheads were used for big game
